

Recommendations and Problems

Monthly Reports for June 1959

CARTOGRAPHY DIVISION

25X1A9a

The extended medical leave of [REDACTED] has necessitated the continued help from the Printing Services Division in the Composing Section. The help at this critical point in the production procedure is much appreciated by D/GC. As the situation is indefinite at present the temporary arrangement will be continued as long as possible.

FAR EAST COMPILATION BRANCH

The Branch received a written "Complaint" from the Materials Division of ERA in June in regard to late delivery of maps for NIS contributions. An expression of ideas in this matter has already been presented to the Cartography Division Chief. It seems to this Branch that the problem lies basically in the approach taken toward NIS contributions in the area of D/GC contribution to the project being active or passive.

GEOGRAPHY DIVISION 25X1A9a

The Far East/Pacific Branch expresses concern at the prospect of detailing [REDACTED] to the staff of "Guardmount" and the resultant impact on their regular China research activities; they hope and recommend that his role can be limited to providing expert substantive advice on non-routine problems of Chinese geography.

MAP LIBRARY DIVISION

PROCESSING BRANCH

The typing of the Acquisitions List for Maps of Foreign Areas is still being carried on by temporary arrangements. The typing service at the clerical pool, normally utilized, has not been resumed.
